Experience

2024 - Current: Frontend developer for the City of San Francisco
Earthquake Soft-Story Awareness Web Application:
https://safehome.report/

I contributed to building a responsive user interface for a web app that enhances earthquake preparedness in San Francisco. Utilizing **Next.js**, **TypeScript**, and **Chakra UI**, I created a user-friendly experience that encourages people to be better prepared. Through **Jest** testing, I ensure reliable application performance, reinforcing the project's goal of strengthening community safety.

2023 - Current: Frontend Developer
Local Transport Company Web Application:
https://iujex.com/

I implemented responsive user interfaces for a responsive multi-role web portal using **React.js**, **Redux, TypeScript**, and **Sass**, enhancing user experience for customers and business owners across multiple devices. Now, I provide ongoing support to ensure the app optimizes business processes for cargo, drivers, and vehicle management.

2020 - 2023: Self-employed Frontend Developer

Planner Web Application: Worked with a senior developer to build **React** components using **Bootstrap** and integrated them with backend functionality.
Online Budgeting Tool: Designed and developed a responsive interface using **React** and **Material UI,** implementing reusable components and API calls.
Car Dealership Website: Developed the site using **React** and **Redux**, working closely with designers, developers, and QA engineers.
Online Mortgage Calculator: Built a calculator in **React** from a provided design, working with a manager and QA engineer.
Ice-cream Parlor Website: Created a mobile-first website with semantic **HTML** and **CSS** preprocessors, optimizing for **SEO** and accessibility.
Online Booking Tool: Developed a booking SPA with **React** and **Redux**, using **Jest** for unit testing to ensure proper functionality.

2012 - 2022: IT Consultant and Lead for Front- and Back-end Teams at Accenture

Worked as a member of frontend and back-end development teams in IT Consultant role, where I led a team of developers to execute projects efficiently. Conducted systems assessment, prepared documentation, composed requirements, negotiated design, and tested the resulting applications. Through effective leadership and clear communication, I ensured alignment between development goals and client expectations.

Objective

Frontend developer with vast corporate experience as an IT consultant and a strong background in React and TypeScript development, seeking opportunities to apply skills and creativity to create impactful web experiences

Skills

JavaScript, TypeScript, Python

React, Redux, NextJS
